

Risk Committee Report – June 2026

Quarterly Risk Assessment & Mitigation Update

Date: 5 June 2026

Classification: Restricted

Prepared by: Risk & Compliance Division

Next Review: September 2026

1. Risk Dashboard Summary

Risk Category	Severity	Likelihood	Status	Owner
Cybersecurity – Infrastructure	High	Medium	Mitigating	CTO Office
Regulatory Non-Compliance	Medium	Low	Monitoring	Chief Compliance Officer
Geopolitical Disruption	High	Low	Watch	CSO
Talent Shortage	Medium	High	Action Required	CHRO
Digital Asset Market Volatility	High	High	Hedging	CFO
ESG Reporting Gap	Low	Medium	In Progress	Sustainability Team

2. Emerging Risks – Q2 2026

Two new risks have been elevated to the committee's attention this quarter, both arising from the rapidly shifting global digital asset regulatory landscape.

- MiCA (EU Markets in Crypto-Assets Regulation) full implementation has triggered a wave of crypto firms relocating operations outside the EU. Several are evaluating our center and Dubai simultaneously — failure to respond with competitive licensing terms within 60 days may result in 8-12 potential registrants choosing a peer center.
- US Treasury guidance on stablecoin reserves published in May 2026 has indirect implications for our licensed stablecoin issuers. Legal review is underway.

3. Mitigation Actions In Progress

- Cybersecurity: Third-party penetration test scheduled for 20 June 2026. Results expected within 10 business days.
- Talent: Partnership with three international universities announced; graduate placement program launching Q3 2026.
- Digital Assets: Regulatory Policy team drafting enhanced stablecoin guidance — stakeholder consultation opens 1 July 2026.

4. Incidents – Quarter to Date

No material regulatory breaches or operational incidents were recorded during Q2 2026. One minor IT access control anomaly was detected and resolved within 4 hours on 22 April 2026. Post-incident review completed; no data was compromised.
