

Board Strategy Memorandum – Q2 2026

Strategic Priorities & Market Positioning Update

Date: 10 June 2026
Classification: Confidential
Prepared by: Office of the CSO
Distribution: Board Members, Executive Committee

1. Executive Summary

This memorandum outlines our strategic priorities for Q2 2026 and provides an assessment of our competitive positioning relative to peer international financial centers. The quarter has been marked by accelerating capital inflows from Asia-Pacific investors and a favorable regulatory environment for digital asset licensing. Leadership attention is required on talent acquisition and infrastructure capacity.

2. Strategic Priorities

- Accelerate digital asset licensing framework to capture first-mover advantage versus Dubai (DIFC) and Singapore (MAS).
- Expand bilateral financial cooperation agreements with GCC sovereign wealth funds.
- Launch the Financial Innovation Hub Phase 2 with three anchor tenants confirmed.
- Strengthen ESG reporting requirements in alignment with ISSB standards.
- Recruit 12 senior regulatory and compliance professionals by end of Q3 2026.

3. Market Environment

Global capital markets remain cautious amid persistent inflation in Western economies, while GCC-based investors are increasingly reallocating toward regional financial centers. Our center has recorded a 14% year-on-year increase in new entity registrations, driven primarily by fintech and asset management firms. The digital assets segment grew 28% in licensed entities compared to Q2 2025.

4. Key Performance Indicators

KPI	Q2 2025	Q1 2026	Q2 2026	Target
New Entity Registrations	312	358	356	380
Assets Under Management (USD bn)	1148	162	171	175
Licensed Fintech Firms	84	97	109	120
Digital Asset Licenses	12	19	28	35
Workforce (FTE)	1,240	1,285	1,310	1,350

5. Risk Flags

- Regulatory arbitrage risk: Singapore MAS proposed a 30-day fast-track license for crypto custodians — response required.
- Talent pipeline: Senior compliance roles remain unfilled for an average of 97 days.
- Technology infrastructure: Core registry system requires upgrade before Q4 2026 to support projected volume.
